Flexible. Compatible. Scalable.
Technology you can bank on.

Maximize client satisfaction and branch productivity with the next generation of secure, customer- centric branch transformation platforms from Nautilus Hyosung. The **MX8800** streamlines branch transactions and delivers quick and secure autonomously or with the assistance of branch staff.

EXPERIENCE THE POWER OF CHANGE.

MAXIMIZE PRODUCTIVITY

- The **MX8800** automates many routine teller transactions seamlessly and supports a variety of options for supporting the customer in person or via remote video conference. The result? The ability for branches to handle more transactions with fewer resources.

CUSTOMIZE YOUR SOLUTION

- Choose from a wide variety of configuration and integration options, standard hardware features, and personal engagement tools to meet customers' unique needs while optimizing branch time and resources.

BUILD TRUST

- The **MX8800's** many security features protect both consumer and institutional data enabling the ability to develop long-term, trusted, client relationships.

EMPOWER BRANCH EMPLOYEES

- Serve more customers in new ways by eliminating manual processes. The **MX8800** frees staff to focus on identifying and promoting bank products that can help customers achieve their financial goals.
EXCEED CLIENT EXPECTATIONS

- Today's customers demand safe, secure, and efficient money- management solutions. The **MX8800** increases client satisfaction levels by supporting self-service and assisted transactions from a single terminal.
